# You've got our attention. WE'D LIKE TO GET YOURS.

We know that if you're settled in long production runs of long lifecycle products with no change on the horizon you may not be ready to talk to us. However, if new products or markets, supply chain rationalisation or demands for greater efficiency are driving change in your manufacturing requirements, now is the time to talk.

TFC through many years of experience, have built expertise, systems and above all a team of people that can help steer you through the difficulties of change, towards efficiency and long term cost reductions.

## This is how **we do it.**

### **Manufacturing Capabilities**

A flexible workspace and a skilled and experienced workforce provide the platform for world class manufacturing. From complex cable harnessing through high level assembly to full box-build TFC supply a fast, responsive and high quality service. With total employee engagement in the quality process, TFC is committed through its quality standards to continuously improving products, processes and customer service.

### **New Product Introduction**

TFC's NPI services are designed to assist you to get your products to market quickly and economically. Our New Product Introduction Team have considerable industry knowledge and experience in Design for Production, testing and quality engineering. A highly flexible manufacturing capability provides for prototyping and low volume production runs prior to full volume manufacture.

### **Global Reach**

With clients on 5 continents and supply and manufacturing partners in the developed and developing world, TFC can rightly claim to have a truly global capability. Wherever your production facilities or markets are located we can help you increase efficiency.

### **Sourcing & Supply Chain Optimisation**

Increasing commercial advantage while improving technical and quality standards is our goal. TFC offers world-class supply chain management and sourcing services that drive long term cost reduction benefits to clients. We have strong relationships with key global suppliers and have developed robust supplier assessment processes that ensure quality is maintained at all times.

### **World-Class Systems**

Underpinning TFC's ability as a manufacturing partner are a range of world-class systems and capabilities. Our web enabled ERP system ensures complete control of all elements of the production process from supply to delivery and invoicing. Our ISO9001:2000 registered quality systems and excellent product and component test competencies ensure cost efficient manufacturing and customer satisfaction for our customers and yours.

We're ready to talk to you.
